

Cependant, dans les mêmes conditions expérimentales, le cycle de *C. serratus* est plus long. En effet, à une température de 30°C, une humidité relative de 75% et en présence de graines d'arachide, le cycle de la bruche de l'arachide est estimé à $57,7 \pm 22,0$ jours (NDIAYE, 1991).

New and interesting records of Diptera Acalyptrata from Spain. Part I: Acartophthalmidae, Opomyzidae, Anthomyzidae, Asteiidae, Carnidae, Tethinidae, Milichiidae and Cryptochetidae

by M. CARLES-TOLRÁ

Avda. Príncipe Asturias 30, ático 1a, E-08012 Barcelona, Spain.

Summary

Faunistical data of eight acalyptrate families (40 species) from Spain are given. One family, four genera and 25 species are recorded for the first time from Spain. Three species are also new records to Europe.

Résumé

On présente les données faunistiques de huit familles de Diptères acalyptrates (40 espèces) d'Espagne. Une famille, quatre genres et 25 espèces sont signalés pour la première fois pour la faune d'Espagne. Trois espèces sont aussi nouvelles pour la faune d'Europe.

During the last decade the author has collected Diptera (mainly Acalyptrata) in Spain, chiefly in Catalonia (Northeast of Spain). Due to the great number of specimens collected it has been necessary to divide the obtained results in four separated papers. Here is presented the first one (see CARLES-TOLRÁ, in press).

In this first part the following families are treated: Acartophthalmidae, Opomyzidae, Anthomyzidae, Asteiidae, Carnidae, Tethinidae, Milichiidae and Cryptochetidae, represented by 1,386 specimens in 15 genera and 40 species. In all, 1 family (Anthomyzidae), 4 genera (*Anthomyza* FALLÉN, 1810, *Leiomyza* MACQUART, 1835, *Hemeromyia* COQUILLET, 1902 and *Neophyllomyza* MELANDER, 1913) and 25 species are recorded for the first time from Spain (of these species, 3 are moreover new to Europe: *Meoneura perlamellata* HENNIG, 1937, *Meoneura subfreta* PAPP, 1979 and *Desmome-topa varipalpis* MALLOCH, 1927).

Carles-Tolrà, 1992

As far Spanish records are concerned, it is worth mentioning that in many species the findings are second records to the Spanish fauna. All the specimens were collected by the author, mainly by means of bait traps (carrion, excrements, fat, etc.) and by sweeping on vegetation.

Almost all the material has been classified by the author and is deposited in his private collection.

The number of males and females examined is separated by / (♂♂/♀♀).

Acartophthalmidae

Acartophthalmus bicolor OLDENBERG, 1910

Material examined: 1/1. Barcelona: Montserrat, 23-28.VI.1984 1/1.

Specimens: collected on carrion (chicken).

Distribution: Europe, USSR and Nearctic Region.

Spanish records: New species to Spain.

Acartophthalmus nigrinus (ZETTERSTEDT, 1848)

Material examined: 0/5. Gerona: Ogassa, 7-19.VII.1984 0/5.

Specimens: collected on carrion (chicken).

Distribution: Europe, USSR, Mongolia and Nearctic Region.

Spanish records: second record from Spain. First record from Gerona.

Opomyzidae

Geomyza balachowskyi MESNIL, 1934

Material examined: 1/0. León: León, 8.VI.1983 1/0.

Specimens: swept on grass.

Distribution: France, Great Britain, Czechoslovakia and Hungary.

Spanish records: New species to Spain.

Geomyza tripunctata FALLÉN, 1823

Material examined: 85/88. Barcelona: Barcelona, 21.XI.1982 2/0, 16.I.1983 3/3, 6.II.1983 3/4, 1.III.1983 1/2, 11.XI.1983 1/1, 24.XII.1983 0/4, 20.I.1984 0/2, 7.IV.1987 0/1; Begas, 30.IX.1982 0/1; Bigas, 25.IV.1987 0/1, 13.V.1987 0/1; Canoves, 5.I.1983 6/2; Cardedeu, 5.I.1983 2/1; Castelldefels, 10.XII.1983 13/20; Corbera, 26.XII.1983 5/5; La Batlloria, 3.VI.1984 1/2; Pantano de Foix, 12.V.1984 1/0; S. Specimens: collected drowned in a swimming-pool.

Distribution: recorded only from Spain.

Spanish records: second record from Spain. First record from Barcelona.

Acknowledgements

I want to express my most sincere thanks to all those dipterists who sent me copies of their publications. But specially to Dr. NARTSHUK (Lenin-

grad), Dr. ROHÁČEK (Opava) and Dr. MUNARI (Venezia) for their help and comments on Opomyzidae, Anthomyzidae and Tethinidae families respectively.
